

Domestic Manual Rollers - Care & Maintenance Guide

Coveroll Gear Drive | Coveroll Seat

Your roller requires care and maintenance to achieve maximum life and to uphold the warranty. The following are recommended maintenance steps:

1. Do not store chemicals close to rollers.
2. Keep all castor wheels clean and free of debris (e.g. hair).
3. If the roller is in a pit or a box, it is important to keep the area free of debris that could interfere with the operation of the roller.
4. Rollers can be cleaned down with a cloth and if in an indoor environment sprayed with a clear anti-corrosive spray.
5. Do not stand or sit on the roller tube.
6. Where rollers are installed or stored indoors, be sure to keep the area well-ventilated.
